Planetary gearboxes

Cost effective

Robust

Compact

The planetary gearboxes are characterized by a robust design and are employed for uses where high-performance and reduced dimensions are required.

The gear trains can be made of steel or plastic polymers, also in blended configurations when needed.

The gearboxes are lubricated according to the needs with reference to temperature and functionality. They are available with sleeve, ball or customized bearings.

Available also in personalized options designed upon request.

Features

Gear materials	Metal / Polymer
Diameter	from 10mm to 42mm
Torque	from 0.2Nm to 45Nm
Operating temperature	-20° +100°C (special lubrication might be needed)
Estimated operating lifetime	Lifetime depends on gearbox working conditions. Operating life span can vary between 1.000 to 3.000 work hours.

Input-stage geartrain

Polymer (for quiet operation)

Table explanation

1 Housing material

2 Geartrain material

Geartrain could be in metal and polymer to increase torque performance and reduce noise.

3 Max input speed (continuous operation)

It is based on service life considerations. If this value is greatly exceeded, the service life can be shortened, the gear heats up more and more noise is generated.

4 Bearing on output shaft

It is possible to choose a ball bearing or sleeve bearing depending on the application, as standard from size 22 is available only for ball bearings.

5 Max radial load (dynamics)

The value is given for a typical distance from the front flange. As the distance increases, this value decreases.

6 Max. axial load

Dynamic: axial loading permissible in operation. If different values apply for traction and thrust, the smaller value is given.

7 Max shaft press fit force

Maximum axial force applying to the shaft at standstill if the force is not input at the other shaft end. This is not possible for motors with only one shaft end.

8 Radial play

The radial measurement is always carried out under a test force that is smaller than the maximum radial load.

9 Axial play

The value for the axial play of a gear is determined between the two axial end positions of the output shaft.

10 Temperature range

The temperature range is -20°C and +125°C, but may be extended for some gears. Special lubrication can be supplied on request, even for other temperature ranges.

11 Number of stages

It states the number of gear stages engaged in series.

12 Reduction ratio

The reduction indicates the ratio by which the speed of the gear output shaft is smaller than the motor speed.

13 Gear length L [mm]

L describes the gearbox length (adapter flange included).

14 Continuous torque [Nm]

The continuous torque provides the maximum load permanently delivered to the output shaft. It can be exceeded, but it affects the service life.

15 Intermittent torque [Nm]

The short-time torque is the maximum torque that may be output on the output shaft.

16 Efficiency [%]

The specified efficiency is a maximum value that is valid for maximum continuous torque. The efficiency is stage-dependent and is related to the output torque and operating temperature.

17 No load backlash [°]

Gear backlash is the turning angle of the gear output shaft when the input shaft is blocked.

18 Weight [g]

Table explanation

1 Housing material

2 Geartrain material

Geartrain could be in metal and polymer to increase torque performance and reduce noise.

3 Max input speed (continuous operation)

It is based on service life considerations. If this value is greatly exceeded, the service life can be shortened, the gear heats up more and more noise is generated.

4 Bearing on output shaft

It is possible to choose a ball bearing or sleeve bearing depending on the application, as standard from size 22 is available only for ball bearings.

5 Max radial load (dynamics)

The value is given for a typical distance from the front flange. As the distance increases, this value decreases.

6 Max. axial load

Dynamic: axial loading permissible in operation. If different values apply for traction and thrust, the smaller value is given.

7 Max shaft press fit force

Maximum axial force applying to the shaft at standstill if the force is not input at the other shaft end. This is not possible for motors with only one shaft end.

8 Radial play

The radial measurement is always carried out under a test force that is smaller than the maximum radial load.

9 Axial play

The value for the axial play of a gear is determined between the two axial end positions of the output shaft.

10 Temperature range

The temperature range is -20°C and +125°C, but may be extended for some gears. Special lubrication can be supplied on request, even for other temperature ranges.

11 Number of stages

It states the number of gear stages engaged in series.

1	Housing material	Metal						
2	Geartrain material	Metal/Polymer						
3	Max input speed (continuous operation)	rpm	≤ 10.000					
4	Bearings on output shaft		Ball bearings					
	Max shaft load							
5	Radial (5mm from mounting face)	N	≤ 200					
6	Axial	N	≤ 100					
7	Max shaft press fit force	N	≤ 120					
	Shaft play							
8	Radial	mm	≤ 0.1					
9	Axial	mm	≤ 0.2					
10	Operating temperature range	°C	-20 +125					
11	Number of gear stages			1	2	3	4	5
12a	Reduction ratio ("A" combination)			3.1:1	5.7:1	10:1	43:1	115:1
				4.2:1		12:1	54:1	159:1
						15:1	72:1	225:1
						20:1	83:1	661:1
							400:1	1080:1
							461:1	2300:1
								4060:1
								5247:1
12b	Gearhead Length L ("A" combination)	mm	39.2	41.7	51.2	60.2	62.7	75.2
13a	Reduction ratio ("B" combination)			3.1:1	5.7:1	10:1	43:1	115:1
				4.2:1		12:1	54:1	159:1
						15:1	72:1	225:1
						20:1	83:1	661:1
							400:1	1080:1
							461:1	2300:1
								4060:1
								5247:1
13b	Gearhead Length L ("B" combination)	mm	34.2	39.2	46.2	55.2	60.2	70.2
18	Continuous torque	Nm	3		12	16		25
19	Intermittent torque	Nm	5		20	25		36
20	Max Efficiency	%	90		81	73		65
21	No-Load Backlash	°	0.8		1	1		1.2
22	Weight	g	250		345	405		490
								580

Motor combinations "A"

SVTN A - Brushless

SVTN A 01-4058

SVTN A 01-4070

SVTN A 01-4088

SVTN B - Brushed

SVTN B 01-4050

SVTN B 01-4070

Motor combinations "B"

SVTN A - Brushless

SVTN B - Brushed

SVTN A 01-3660
